

# Commercial and Industrial Floor Coatings

## ArmorThane Flooring Applications

When commercial and industrial floors take abuse, ArmorThane Polyurea and Polyurethane sprayed-on and roll-on coatings make more sense than other products. Surfaces are repaired and protected long term against cracking, corrosive chemicals and the wear from heavy foot or wheel traffic. Many of our products are even less expensive than comparable epoxy coatings with better durability. Whether coating a new structure or repairing damaged floors, ArmorThane is the best choice.

## Floor Coating Benefits for New and Old

Because our products have different attributes, it is easy to guard against the various use and environmental circumstances that might be harmful for a floor. For example, a showroom needs to be attractive, easy to clean and avoid abrasion with movement of merchandise. An auto garage or chemical plant requires flooring that resists corrosion or caustic spills. A veterinary floor is scrubbed constantly so coatings must be waterproof and scratch resistant to prevent spread of bacteria or disease. A hotel indoor pool needs anti-slip particulates. A commercial marina opens liability with splinters in wood flooring. We have a solution for these problems and more.

**The Most Durable Protective Coatings Available**

## Beyond Indoor Features

Many facilities have both indoor and outdoor environments to consider. Covering surfaces on worn out patios, porches, pool decks, walls, walkways, bridges and park pavilions prevents further deterioration and revitalizes valuable landscaping. Decorative water features and ponds can be waterproofed. Concrete loading docks, even parking lots, can be repaired and protected to reduce maintenance.

## Safe for All Environments

These coatings are safe for people, marine animals and plants. They have no VOC's or solvents and there is little risk of absorbing contained materials like other surfaces. Surfaces are easy to clean and textures and particulates can be added to prevent slipping.

## Mobile Coatings

Coating products can be sprayed any time, any place. Unlike many other companies, we custom-build trailers to meet your specifications. ArmorThane has all of the high-pressure and low-pressure equipment and supplies needed to be fast and efficient.

## Flooring Design Choices

Even industrial flooring should be both attractive and highly durable. ArmorThane products can be pigmented to a matching color or used as a design accent. If color retention in sunlight exposed areas is important, we offer both UV stable topcoats and aliphatic polymers to prevent fading.

Quick-dry options can incorporate creative designs such as faux tile or brick and logos. Being both attractive and durable, our coatings are often used in residential construction.

## Concrete, Wood and More

Commercial and industrial underlayment is typically concrete or wood, but can be applied to many substrates. ArmorThane coatings offer a variety of benefits with superior properties such as:

- Crack resistance
- Seamless waterproofing
- Extreme weatherproofing
- Splinter elimination
- Noise and vibration reduction
- Scratch, dent, abrasion resistance
- Stands up to heavy foot traffic
- Safe for wheel traffic
- Chemical resistance
- Anti-slip, skid resistance
- Warp and rot resistance
- Aliphatic, UV fade resistance

Ask us for more details on specific product solutions and how they are applied.

## Products and Processes Match Your Coating Needs

We have a number of coatings which are applied to indoor and outdoor flooring projects. Please visit product pages on our website or call for specifications on these key items:

- ArmorFloor PA 2-part roll-on, aliphatic polyaspartic
- ArmorShield waterborne polyurea
- SureGrip soft polyurea
- STS-200 polyurethane
- STS-300 polyurethane
- HighLine-310 polyurea
- HighLine-410 fade-resistance aliphatic polyurea
- ArmorDeck moisture-cured polyurethane

In addition, ArmorThane has coating products developed to help industries solve a variety of problems. Solutions may include:

- Coat multiple surfaces
- Protect against extreme temperatures
- Resist corrosion and abrasion
- Protect against high wear
- Create a leak-proof barrier
- Improve slip and skid resistance
- Add permanent color coating, signs
- Create a blast-resistant barrier
- Repair and prevent cracks

Your goal is to repair and ensure long-term protection of structures against abusive elements found in commercial and industrial settings. Ours is to help you apply the right solutions.

## Protecting Your World

**ArmorThane** is a multi-national company founded by Garry Froese, CEO, in 1989. We have facilities in the U.S. and Canada and export to large dealers around the world.

We specialize in the development, manufacturing and distribution of top-quality protective coatings, as well as the design and fabrication of commercial application equipment. Our products include pure and specially-formulated hybrid polyurea and polyurethane with spray and roll-on applications. We provide low and high-pressure spraying equipment and supplies for fixed locations. Plus, we custom-build mobile coatings units for travel to any project site.

In addition to Flooring projects, thousands of applications benefit from ArmorThane's protective coatings. If you would like to know more about specific products and applications, just give us a call.
