

Secondary Containment Polyurethane/Polyurea Coatings

ArmorThane[®]

Protecting Your World.

Safeguard Secondary Containment

Back-up systems typically involve hazardous materials such as chemicals, fuels, waste water, crude oil and other corrosive liquids. Our polyurethane and polyurea coatings are used to prevent surface degradation that can cause secondary containment systems to fail. Reactants and corrosive materials sit harmlessly against the polymer barrier. Coatings are not damaged by constant exposure to direct sunlight. Surfaces expand and contract without cracking in extreme weather.

Variety of Uses

AzorThane industrial coatings are involved in the construction and rehabilitation of all types of containment systems. These structures may be sealed or open air with surfaces of metal, plastic, concrete or geotextile materials. Dirt berms are not enough.

Some of these coating uses include:

- Oil and Gas Well Sites and Facilities
- Chemical Facilities and Storage Areas
- Tanks Farm Dikes or Berms
- Sumps and Trenches
- Drum Storage Areas
- Petroleum Storage

Rubber Liner and Paint Problems

Rubber lining, paint and other surface protection simply do not last as long as polymers such as polyurethane and polyurea. They can also release and absorb materials causing contamination. And, they do not have the same abrasion and corrosion resistance as polyurethane or polyurea. Chemically aggressive fluids will find and exploit weaknesses found in rubber linings and paint. Many of our products are less expensive than comparable epoxy coatings with better durability.

Custom Application

Unlike pre-formed liners, sprayed-on coatings are thinner and take up less space. They form a seamless membrane that exactly fits the shape, even where poles, pumps and other internal or external structures attach. Penetrations such as piping and drains are sealed so that even vibrations do not cause an unexpected leak.

Beyond Secondary Containment

In addition to secondary holding vessels, ArmorThane also has products for a variety of specific solutions involving primary containment, water features, wastewater treatment and sanitation systems. Ask us for more details on these issues.

The Most Durable Protective Coatings Available

Suggested Products

We have a number of coatings which are applied to secondary containment projects. Please visit product pages on our website or call for specifications on these key items:

- EnviroThane modified polyurea
- Armor HiChem polyurea
- HighLine-310 polyurea
- HighLine-510 pure polyurea
- SureGrip soft polyurea

Mobile Coatings

In addition to fixed workshop locations, coating products can be sprayed any time, any place. And, unlike many other companies,

we custom-build trailers to meet your specifications. ArmorThane has all of the high-pressure and low-pressure equipment and supplies needed to be fast and efficient.

Products and Processes Match Your Coating Needs

ArmorThane has a variety of coating products developed to help industries solve problems. Benefits may include:

- **Coat a Variety of Surfaces:** metal, concrete, asphalt, fiberglass, wood, wallboard, geotextile material over sand, dirt, gravel
- **Proactively Add Surface Protection:** against intense sunlight, extreme heat and cold, wind, high wear, abrasion, water, gas or chemical leaks or spills
- **Solve Difficult Problems Caused By Adverse Conditions:** fading and discoloration, corrosion, rust, scratches, denting, cracking, warping, high energy costs
- **Provide Safer Environments:** secondary containment, compliance with health regulations for food processing, waterproof barrier to prevent bacteria/mold, easy-clean surfaces, slip and skid resistance, stronger surfaces, and increased security for military, government, other facilities
- **Add Color and Design Inside or Outdoors:** rejuvenated dull or discolored surfaces, UV color stability, permanent color coding, endless decorative ideas for logos, patterns, borders, etc using masks, tape or stencils (more durable than paint)
- **Add Fire Retardant Properties:** protection in areas that may be exposed to extreme heat or fire

Different products have unique physical properties. That's why it's important to combine products and processes with our technical expertise and experience. We make sure you apply the right solutions to your coating problems.

Protecting Your World

ArmorThane is a multi-national company founded by Garry Froese, CEO, in 1989. We have facilities in the U.S. and Canada and export to large dealers around the world.

We specialize in the development, manufacturing and distribution of top-quality protective coatings, as well as the design and fabrication of commercial application equipment. Our products include pure and specially-formulated hybrid polyurea and polyurethane with spray and roll-on applications. We provide low and high-pressure spraying equipment and supplies for fixed locations. Plus, we custom-build mobile coatings units for travel to any project site.

In addition to Secondary Containment projects, thousands of applications benefit from ArmorThane's protective coatings. If you would like to know more about specific products and applications, just give us a call.

USA and INTERNATIONAL
