

Repair, Leak Proof, Decorate Water Features

Coating to Build or Repair Water Features

Both commercial and residential decorative water features are made permanently leak proof with ArmorThane Polyurea and Polyurethane sprayed-on coating products. These products are used to repair damaged surfaces and to protect newly built structures.

In addition, decorative features are protected against corrosive chemicals and natural erosion of water movement. Our products do not crack, peel or buckle with freeze-thaw weather cycles.

Water Feature Applications

AarmorThane coatings can be applied to many substrates including concrete, wood, stone, brick, metal, fiberglass and geotextile material. Water-tight barriers are perfect for fountains, water parks, ponds, animal watering holes and decorative still and running water features. Whether coating a new structure or repairing cracks and leaks, ArmorThane is the best choice.

Landscape Design Choices

AarmorThane products can be pigmented to a matching color or used as a design accent. If color is important, we offer both UV stable topcoats and aliphatic polymers to prevent fading. Quick-dry options can incorporate creative designs such as faux tile or brick and logos.

Beyond Water Features

Going beyond water features, our products add protection and beauty to the entire outdoor environment. Covering surfaces of worn out patios, porches, pool decks, walls, walkways, bridges and park pavilions prevents further deterioration and revitalizes valuable landscaping. ArmorThane coatings are even applied to tables, benches, playground equipment, gazebos, bleachers and much more. Marinas benefit when coatings eliminate splinter injury from old wood.

Safe for All Environments

These professionally applied seamless, waterproof coatings are safe for people, marine animals and plants. They have no VOC's or solvents and there is little risk of absorbing contained materials like other coatings. Surfaces are easy to clean and textures and particulates can be added to prevent slipping. US ANSI NSF-61 certified potable water coatings are also available.

Our wide range of pure and hybrid polymer products allow applicators to spray in warm, humid climates or extreme cold. Once we know the extent of conditions, we make sure the project will yield maximum performance. Our technical staff trains all applicators to ensure top quality projects from surface repair to preparation to spraying.

The Most Durable Protective Coatings Available

Suggested Products

We have a number of coatings which are applied to water features projects. Please visit product pages on our website or call for specifications on these key items:

- STS-300 polyurethane
- HighLine-310 polyurea
- HighLine-410 fade-resistant aliphatic polyurea
- HighLine-510 pure polyurea
- AquaSafe pure polyurea, potable water certified
- Armor HardCoat polyurea
- SureGrip soft polyurea

Mobile Coatings

In addition to fixed workshop locations, coating products can be sprayed any time, any place. And, unlike many other companies,

we custom-build trailers to meet your specifications. ArmorThane has all of the high-pressure and low-pressure equipment and supplies needed to be fast and efficient.

Products and Processes Match Your Coating Needs

ArmorThane has a variety of coating products developed to help industries solve problems. Benefits may include:

- **Coat a Variety of Surfaces:** metal, concrete, asphalt, fiberglass, wood, wallboard, geotextile material over sand, dirt, gravel
- **Proactively Add Surface Protection:** against intense sunlight, extreme heat and cold, wind, high wear, abrasion, water, gas or chemical leaks or spills
- **Solve Difficult Problems Caused By Adverse Conditions:** fading and discoloration, corrosion, rust, scratches, denting, cracking, warping, high energy costs
- **Provide Safer Environments:** secondary containment, compliance with health regulations for food processing, waterproof barrier to prevent bacteria/mold, easy-clean surfaces, slip and skid resistance, stronger surfaces, and increased security for military, government, other facilities
- **Add Color and Design Inside or Outdoors:** rejuvenated dull or discolored surfaces, UV color stability, permanent color coding, endless decorative ideas for logos, patterns, borders, etc using masks, tape or stencils (more durable than paint)
- **Add Fire Retardant Properties:** protection in areas that may be exposed to extreme heat or fire

Different products have unique physical properties. That's why it's important to combine products and processes with our technical expertise and experience. We make sure you apply the right solutions to your coating problems.

Protecting Your World

ArmorThane is a multi-national company founded by Garry Froese, CEO, in 1989. We have facilities in the U.S. and Canada and export to large dealers around the world.

We specialize in the development, manufacturing and distribution of top-quality protective coatings, as well as the design and fabrication of commercial application equipment. Our products include pure and specially-formulated hybrid polyurea and polyurethane with spray and roll-on applications. We provide low and high-pressure spraying equipment and supplies for fixed locations. Plus, we custom-build mobile coatings units for travel to any project site.

In addition to Water Features projects, thousands of applications benefit from ArmorThane's protective coatings. If you would like to know more about specific products and applications, just give us a call.
